## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 11 and 19 are allowed.

The prior art discloses a communications system for providing bi-directional data communications on a backplane wherein the backplane includes a communications channel with transmitter and receiver modules accordingly and a transmitter module includes equalization circuitry having at least one tap wherein the tap includes an adjustable coefficient.

The prior art however fails to disclose or suggest wherein while a coded data stream is being transmitted from a transmitter module to a receiver module an adjustment mechanism in a transmitter module is configured to dynamically determine an adjustment coefficient for an adjustable tap based on information received on a back channel from the receiver module to the transmitter module and apply the adjustment coefficient to adjust the tap.
